

## 1010AL

Security category

O3L

Additional requirements

A, AN, CI, E, FO, HI, HRO, SR, WR

### PRODUCT DESCRIPTION:

Boots type "C", with upper in breathable and water-repellent full grain leather and cordura inserts. Waterproof and breathable PTFE membrane lining. Malleolus protection. Fastening: laces passing through metal eyelets. Kevlar anti-perforation insole. Rubber outsole, anti-static, abrasion and slip resistant. Shock-absorbing heel, resistant to hydrocarbons. "Ago" working.

Outsole

QUAM: Antistatic and anti-slip in nitrile rubber. The Quam outsole is suitable for those working outdoors or where high water resistance is required

Size

36-48

Processing

AGO: The Ago processing is the most common because it makes the shoe flexible and light. The processing consists of joining the upper to the sole through glues, avoiding the use of other joints that stiffen the structure and lead to a loss of comfort in the foot

Protection

Anti-perforation insole: Kevlar textile material

Sector

Army, Police and Law Enforcement

Footwear type

C (calf boot)

Upper

Leather: Water repellent full-grain leather 1.8-2.0 mm, Cordura fabric: 3D woven fabric that ensures high breathability

Lining

PTFE membrane lining: WINDTEX - Bi-component microporous PTFE membrane that provides high waterproofness, breathability and resistance

Insole

Anti-perforation: Protects the foot against possible injury caused by the presence of perforating material on the floor.
