

FIREMAN

Norm UNI EN ISO 15090:2012, UNI EN ISO 20344:2022, UNI EN ISO 20345:2022

Security category III

Additional requirements AN, CI, F2A, FO, HI3, HRO, SR, WR

PRODUCT DESCRIPTION:

Firefighter rescue boots type "C" increased of 8 cm, with full-grain waterproof and breathable black calf leather upper (thickness 2.4 / 2.6) + yellow reflex insert. Rubber protection strip on toe. Waterproof and breathable 4-layer PTFE membrane lining, resistant to chemical agents. Steel toe cap and Kevlar anti-perforation insole. Fastening: fireproof laces passing through eyelets and quick-release zip. Heat and cold insulation. Energy absorbing, anti-slip, antistatic, heat, fuel and oil resistant rubber outsole. Resistance to chemical agents by contact. "Ago" processing.

| | |
|---------------|---|
| Lining | PTFE membrane lining: <i>WINDTEX - Bi-component microporous PTFE membrane with high waterproofness, perspiration and resistance</i> |
| Outsole | <i>QUAM: Antistatic and anti-slip in nitrile rubber. The Quam outsole is suitable for those working outdoors or where high water resistance is required</i> |
| Processing | <i>AGO: The Ago processing is the most common because it makes the shoe flexible and light. The processing consists of joining the upper to the sole through glues, avoiding the use of other joints that stiffen the structure and lead to a loss of comfort in the foot</i> |
| Protection | Toe cap and anti-perforation insole |
| Sector | Outdoor environments, Civil Protection, Fire fighters |
| Footwear type | C (calf boot) |
| Upper | Refractive inserts: <i>for better visibility</i> , Leather: <i>Water repellent full-grain leather 1.8-2.0 mm</i> |
| Insole | Anti-perforation: <i>Protects the foot against possible injury caused by the presence of perforating material on the floor.</i> |
| Toe cap | Steel: <i>up to 200J</i> |
