Additional requirements A, E, FO, HI, HRO, SR, WPA, WR

### PRODUCT DESCRIPTION:

Soft, waterproof and breathable full grain leather upper. Fastening through 6 couples of holes and sturdy laces. Waterproof and breathable membrane lining. Ultralight sole with a double layer of PU and phylon, stabiliser and rubber tread. "Ago" processing. Usage and maintenance note: it is important to keep the product always clean using non aggressive cleaning products. Store your footwear dry and clean in the proper place, at room temperature, away from direct heat. Every pair of shoes is packed in a single cardboard box.

Upper	Leather: <i>Water repellent full-grain leather 1.8-2.0 mm</i>
Lining	PTFE membrane lining: <i>WINDTEX - Bi-component microporous PTFE membrane that provides high waterproofness, breathability and resistance</i>
Outsole	<i>ENERGY SHIELD: is a new type of outsole specifically designed for maximum support and comfort. The double action of ultra-light Phylon and soft PU, allows maximum damping. The plastic stabilizing insert protects the foot thanks to a maximum support of the arch. Rubber tread ensures maximum slip resistance and anti-abrasion.</i>
Processing	<i>AGO: The Ago processing is the most common because it makes the shoe flexible and light. The processing consists of joining the upper to the sole through glues, avoiding the use of other joints that stiffen the structure and lead to a loss of comfort in the foot</i>
