KNIFE

Norm UNI EN ISO 20344:2022, UNI EN ISO 20347:2022

Security category O3L

Additional requirements A, CI, E, FO, HI, HRO, PL, SR, WPA

PRODUCT DESCRIPTION:

Low shoes type "A" with water repellent full-grain leather and cordura fabric upper. Waterproof and breathable membrane lining. Ultralight phylon and PU outsole with stabilizer + slip resistant rubber tread. Elastic lacing. Kevlar textile antiperforation insole. Ago working.

Upper Leather and fabric inserts: Water repellent full-grain leather and highly

breathable cordura fabric

Lining PTFE membrane lining: WINDTEX - Bi-component microporous PTFE membrane

that provides high waterproofness, breathability and resistance

Outsole ENERGY SHIELD: is a new type of outsole specifically designed for maximum

support and comfort. The double action of ultra-light Phylon and soft PU, allows maximum damping. The plastic stabilizing insert protects the foot thanks to a maximum support of the arch. Rubber tread ensures maximum slip resistance

and anti-abrasion.

Insole Anti-perforation: Protects the foot against possible injury caused by the

presence of perforating material on the floor.

Processing AGO: The Ago processing is the most common because it makes the shoe

flexible and light. The processing consists of joining the upper to the sole

through glues, avoiding the use of other joints that stiffen the structure and lead

to a loss of comfort in the foot

Size Unisex 36-49

Sector Army, Police and Law Enforcement, Running

Footwear type A (low)
Weight ≤ 500 Lacing elastic
