| Upper | Leather and fabric inserts: <i>Water repellent full-grain leather and highly breathable cordura fabric</i> |
| Lining | PTFE membrane lining: <i>WINDTEX - Bi-component microporous PTFE membrane with high waterproofness, perspiration and resistance</i> |
| Outsole | <i>ENERGY SHIELD: is a new type of outsole specifically designed for maximum support and comfort. The double action of ultra-light Phylon and soft PU, allows maximum damping. The plastic stabilizing insert protects the foot thanks to a maximum support of the arch. Rubber tread ensures maximum slip resistance and anti-abrasion.</i> |
| Toe cap | Composite: <i>resistant up to 200J. Protective strip for toe comfort.</i> |
| Insole | Anti-perforation: <i>Protects the foot against possible injury caused by the presence of perforating material on the floor.</i> |
| Processing | <i>AGO: The Ago processing is the most common because it makes the shoe flexible and light. The processing consists of joining the upper to the sole through glues, avoiding the use of other joints that stiffen the structure and lead to a loss of comfort in the foot</i> |
