

RUN O2

Norm UNI EN ISO 20344:2022, UNI EN ISO 20347:2022

Security category O2

Additional requirements A, E, HRO, SR, WPA, WR

PRODUCT DESCRIPTION:
Low shoe mod. "A" full grain leather upper with water-repellent woven fabric inserts. Highly breathable 3D Airmet® fabric lining. Ultralight sole in phylon, shock-absorbing polyurethane and rubber + anti-torsion stabilizer. "Ago"processing.

- Upper** Leather and fabric inserts: *Water repellent full-grain leather and highly breathable cordura fabric*
- Lining** HYDROPHILIC Membrane: *Waterproof and breathable polyester membrane with thermal insulation*
- Processing** AGO: *The Ago processing is the most common because it makes the shoe flexible and light. The processing consists of joining the upper to the sole through glues, avoiding the use of other joints that stiffen the structure and lead to a loss of comfort in the foot*
- Outsole** ENERGY SHIELD: *is a new type of outsole specifically designed for maximum support and comfort. The double action of ultra-light Phylon and soft PU, allows maximum damping. The plastic stabilizing insert protects the foot thanks to a maximum support of the arch. Rubber tread ensures maximum slip resistance and anti-abrasion.*
- Size** 36-48
- Footwear type** A (low)
- Sector** municipal police
