

RUN O2

Norm UNI EN ISO 20344:2022, UNI EN ISO 20347:2022
Security category O2
Additional requirements A, E, FO, HI, HRO, SR, WPA

PRODUCT DESCRIPTION:

Low shoe type "A". Microfiber upper with water-repellent cordura inserts. Highly breathable and absorbent 3D Airnet® lining. ENERGY SHIELD outsole: ultralight phylon and PU sole + slip resistant rubber tread with anti-torsion stabiliser. "Ago" processing.

Upper	Leather and fabric inserts: <i>Water repellent full-grain leather and highly breathable cordura fabric</i>
Lining	3D Fabric: <i>AIRNET® - Highly breathable and absorbent three-dimensional mesh fabric</i>
Processing	AGO: <i>The Ago processing is the most common because it makes the shoe flexible and light. The processing consists of joining the upper to the sole through glues, avoiding the use of other joints that stiffen the structure and lead to a loss of comfort in the foot</i>
Outsole	ENERGY SHIELD: <i>is a new type of outsole specifically designed for maximum support and comfort. The double action of ultra-light Phylon and soft PU, allows maximum damping. The plastic stabilizing insert protects the foot thanks to a maximum support of the arch. Rubber tread ensures maximum slip resistance and anti-abrasion.</i>
Size	Unisex 36-49
Footwear type	A (low)
